Your #1 Source for Special Education Keyboarding Programs

Great for Educational or Home use

teaching basic computer skills. Our typing lessons (designed by grade level) will improve the student's reading level.

Be prepared for your special education students. We have a teacher's goal and daily lesson plan designed for each program which will permit you to feel comfortable with any person with special needs. Allow us to do what we do best and consider using our programs as part of your State Educational mandate. It is a timely and sophisticated, user-friendly program that will enable your schools at every grade level to meet the Federal guidelines of the "No Child Left Behind" Act. See Web Site for latest product descriptions.

We will be happy to custom design a keyboarding program for your specific needs. For example, you can request a One Hand program for a Blind user.

- One Hand
- Physically Handicapped
- Learning Disabled
- Dyslexic

- Visually Limited & Blind
- Bilingual (English/Spanish)
- Custom Designed for Your Needs
- See Web Site for other programs

KEYBOARDING BY ABILITY – One-Hand Edition

When the person you are working with has the use of only one hand, you will enjoy using our “**Keyboarding for the Physically Handicapped**” – “Keyboarding by Ability”, One Hand Edition Program.

This interactive computer tutorial is especially designed for those with special needs, and includes a complete set of lesson plans and instructional goals, enabling you to fulfill and adhere to the mandates of your Individual Educational Plan (IEP).

One, three and five-minute speed tests are included so you can automatically time and grade the user. **Easy to learn step-by-step format**

As you can see from the picture, the first lesson shows a full visually-cued keyboard with only the learned keys displayed. As the lessons progress, new keys are displayed, thereby allowing the user to focus only on the learned keys.

Through the use of the guide keys, the handicapped person is able to progress at the same rate as other members in the classroom, thus reducing self-consciousness and embarrassment.

As the educator, you will have access to a printed record of all exercises to keep you updated on the student’s progress.

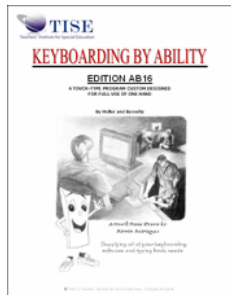

An **unlimited** number of students may use the program, which means you can have more than one student set up at one computer station.

A **site license** allows installation to every computer at your location. Annual License Renewal \$99.⁹⁵ **Includes free upgrades**

B-AB16	Typing Book - Keyboarding by Ability	\$39. ⁹⁵
AB16-S	Add a Site License	\$199. ⁹⁵

One of the most unique tutorials available today to teach the physically handicapped on how to use a standard computer keyboard is the "Keyboarding for the Physically Handicapped" – "Keyboarding by Ability", Master Edition program.

This interactive software program is custom designed for people who are missing any combination of fingers, or who suffer from Cerebral Palsy and may be able to use only one or two fingers or one-hand at best. This is the only program on the market that teaches touch-typing to people with these limitations. Twenty unique editions have been developed based on ability.

Each program includes Methods and a Guide Key Chart with a complete set of lesson plans and instructional goals individually designed for each student. This enables you to fulfill and adhere to your Individual Education Plan (IEP) mandates.

Wide assortments of program packages are available to match applicable disability. Each edition comes with a corresponding typing book.

The Master Edition is available for **Schools, Libraries and Resource Centers**. This edition includes a Master Ability Menu of all twenty programs (**listed below**), for a total of **440 custom lessons** that will allow any disabled person to select a full twenty-two lesson typing course, regardless of what fingers they are able to use.

One, three and five-minute speed tests are included so you can automatically time and grade the user.

We are very proud of this touch typing system. Teachers' Institute for Special Education has spent years researching and working with people with missing digits to develop a method for each ability that would bring the highest results to people who suffer from these restrictions.

An **unlimited** number of students may use the program, which means you can have more than one student set up at one computer station.

MASTER ABILITY MENU

AB1 - Full use of left hand and 3 fingers on right hand	AB11 - 2 fingers on left hand and 1 finger on right hand
AB2 - Full use of left hand and 2 fingers on right hand	AB12 - 1 finger on left hand and full use of right hand
AB3 - Full use of left hand and 1 finger on right hand	AB13 - 1 finger on left hand and 3 fingers on right hand
AB4 - 3 fingers on left hand and full use of right hand	AB14 - 1 finger on left hand and 2 fingers on right hand
AB5 - 3 fingers on left hand and 3 fingers on right hand	AB15 - 1 finger on left hand and 1 finger on right hand
AB6 - 3 fingers on left hand and 2 fingers on right hand	AB16 - Full use of One Hand
AB7 - 3 fingers on left hand and 1 finger on right hand	AB17 - 3 Fingers on One Hand
AB8 - 2 fingers on left hand and full use of right hand	AB18 - 2 Fingers on One Hand
AB9 - 2 fingers on left hand and 3 fingers on right hand	AB19 - 1 Finger, Mouth Stick etc.
AB10 - 2 fingers on left hand and 2 fingers on right hand	AB20 - Full use of Both Hands

NOTE: Do not count your thumb as a finger

SPLIT-SCREEN HELPS LEARNING DISABLED

Students with learning and reading disabilities will benefit from the visually-cued, split-screen approach used in this interactive computer tutorial, "**Keyboarding for Individual Achievement**" – Learning Disabled Edition.

This unique tutorial gives students the security and confidence they need to acquire keyboarding skills at their grade level.

The split-screen approach provides immediate reinforcement for learning disabled students because their performance on the lower screen is sequentially monitored on the upper screen. This combined with our easy-to-follow keyboard of just the learned keys greatly reduces frustrations associated with any reading problems they may have.

GUIDE KEYS:

A S D F J K L :

You are able to automatically time and grade your students using the one, three and five-minute speed tests included in the program. In addition, you have access to a printed record of all exercises. This provides both you and the parent with an accurate record of the student's progress.

The lesson plans and instructional goals enable you to fulfill and adhere to the mandates of your Individual Education Plan (IEP).

Interactive tutorials and typing books are available in Elementary, Junior High, and High School Editions. Teachers' Edition includes grades (1-12).

The Teachers' Edition allows you to select the grade level range appropriate for your students. When the **Level Button** on the Main Menu displays **Elementary**, all the typing lessons and speed tests will be on grade levels 1-6. If you use the **High School** level, all the typing lessons and speed tests will automatically be changed to grade levels 10-12.

An **unlimited** number of students may use the program, which means you can have more than one student set up at one computer station.

A **site license** is available to allow installation to every computer at your location. Annual License Renewal \$99.⁹⁵ **Includes free upgrades**

REAL HUMAN SPEECH OPTIONS FOR THE DYSPLEXIC

To help dyslexic students reach their maximum potential, real human speech options are now part of the “**Keyboarding for Individual Achievement**” – Dyslexic Edition Program.

Each typing lesson is read using real human speech. The combination of audio with visual guidance greatly enhances the dyslexic student's ability to acquire keyboarding skills.

In addition, each lesson incorporates the split-screen approach. This provides immediate reinforcement to students with reading disabilities because actions on the lower screen are monitored on the upper screen.

Included in the program are one, three and five minute speed tests that automatically time and grade the student, as well as a printed record of all exercises. Both are useful in maintaining an accurate record of the student's progress.

The lesson plans and instructional goals enable you to fulfill and adhere to the mandates of your Individual Education Plan (IEP).

Interactive tutorials and typing books are available in Elementary, Junior High, and High School Editions. Teachers' Edition includes grades (1-12).

The Teachers' Edition allows you to select the grade level range appropriate for your students. When the Level Button on the Main Menu displays **Elementary**, all the typing lessons and speed tests will be on grade levels 1-6. If you use the **High School** level, all the typing lessons and speed tests will automatically be switched to grade levels 10-12.

An **unlimited** number of students may use the program, which means you can have more than one student set up at one computer station.

A **site license** is available to allow installation to every computer at your location. Annual License Renewal \$99.⁹⁵ **Includes free upgrades**

KEYBOARDING FOR THE VISUALLY LIMITED & BLIND

Students with visual limitations will greatly benefit from the “**Keyboarding for Individual Achievement**” – Visually Limited & Blind Edition, due to the addition of real human speech and extra large fonts.

All the menus, instructions, typing lessons, and ending lesson menu choices are presented audibly. In addition, when the user navigates the mouse over a lesson choice from the main menu, a magnified window pops-up and reads lesson description to provide easy identification.

As you can see from the display, each screen quadrant has a different visual aid. Students **hear** the letter to type, they **see** a large size **72 font** showing them the letter that needs to be typed, and the keyboard is **highlighted** with the letter to type. A large **marker** keeps track of typing line position.

The Teachers' Edition allows you to select the grade level range appropriate for your students. When the Level Button on the Main Menu displays **Elementary**, all the typing lessons and speed tests will be on grade levels 1-6. If you use the **High School** level, all the typing lessons and speed tests will change automatically to levels 10-12.

REAL HUMAN VOICE:

- Reads all instructions and typing lessons.
- Says lesson student clicks on while providing maximum magnified display.
- Gives encouraging responses and says ending menu selections.
- Colors may be adjusted to your specific requirements.

Students may be automatically timed and graded using the one, three and five-minute speed tests included in the program. In addition, you have access to a printed record of all exercises. This provides both you and the parent with an accurate record of the student's progress.

An **unlimited** number of students may use the program, which means you can have more than one student set up at one computer station.

A **site license** is available to allow installation to every computer at your location. Annual License Renewal \$99.⁹⁵ **Includes free upgrades**
